

FPD China 2007

FPD China this year was held a week before Semicon China. Held at Shanghai International Exhibition Centre (INTEX) from 13 - 15 March, this is the third time ZMC International is participating in the show.

The booth received good response from visitors who are from the local manufacturers of LCD and ITO glass producers. There were a few local small to medium sized manufacturers of this industry who were able to collect valuable information from this exhibition. Indeed, this type of exhibition is a good channel of brand promotion for us and our principal, BORER CHEMIE to position DECONEX line of specialty cleaning solutions for the FPD industry.
